MASTER INDEX 1990-1991

Important — Read this First

This index covers the period from the beginning of 1957 to the middle of 1990 production year; which is to say:

Radio Supplements Nos. 39 to 80
Component Stereo Supplements Nos. 1 to 17
TV Supplements Nos. 24 to 96

Combined — TV-Radio-Hi-Fi Supplements Nos. 97 to 350

In most cases, the listing for each manufacturer starts with their chassis numbers, the appropriate supplement number being shown on the right hand column. This followed by a column of model numbers. However, on manufacturers' bulletins, the terms "Model" & "Chassis" sometimes get interchanged. Therefore, both columns should be inspected. Note also that some model numbers are not available at time of publication. To emphasize, **always use the chassis number if possible to locate the correct RCC manual.**

In some cases, two or three supplement numbers may be given for one model. This will be for one of two reasons: (1) The later supplement gives data on a revised version or (2) the early supplement gave only preliminary data, the complete data being provided by the later supplement.

NOTE: Supplements covering RADIO ONLY ended with No. 80. Supplements covering TV ONLY ended with No. 96. All supplement numbers from 97 up are for the combined TV-RADIO-HI-FI supplements.

Several years ago, a new classification, Component Stereo was included along with Radio and TV. This section provides an alphabetical index of all sets which have been published in the series of Component Stereo Supplements. This series has now been discontinued due to lack of interest. Seventeen manuals were published.

A list of the out of print supplements is as follows:
