TELEVISION IS HERE

you can't shut your eyes to it

Life's latest miracle—something you would have seen you can't shut your eyes to. For about three hours a day, seven days a week, you can look at the world from the narrow circle of your own home. Television has become a practical and thrilling feature of everyday life and entertainment. A Pageant of spectacles, news and sport, plays, entertainment and discussion, all these are open to you and your children, but of a new era of discerning men and women, looking toward a new and enlightening age. Television is here, you can't shut your eyes to it.

Television is so new to this country and so new to you, that you have never before seen it. It is a new and thrilling feature of everyday life and entertainment. A Pageant of spectacles, news and sport, plays, entertainment and discussion, all these are open to you and your children, but of a new era of discerning men and women, looking toward a new and enlightening age. Television is here, you can't shut your eyes to it.
