CABINET DESIGN:

DIMENSIONS—37 $\frac{7}{16}$ " high, 27 $\frac{1}{2}$ " wide, 23 $\frac{3}{4}$ " deep.

SMART "OFF-THE-FLOOR" STYLING with gracefully tapered legs let you clean under set without moving it. Golden metal ferrules protect floors and carpets.

TOP FRONT TUNING puts controls up where they belong! No stoop, no stretch, no strain—you tune from a standing position. And you can place a lamp or books on set without having to remove them when tuning—no inconvenient controls at back of cabinet top.

EASY-TO-SEE INCLINED DIAL—Slanted upward so kingsize channel numbers are easy to read without bending over, yet clearly visible from across the room.

"EASY-GRIP" TUNING CONTROLS WITH GOLDEN TRIM fit your hand comfortably, turn with smooth precision. No fumbling with undersize, hard-to-handle knobs.

"HIGH-SIDE" FINGERTIP AUXILIARY CONTROLS recessed in handsome golden panel at top front of cabinet side, easily adjusted from a standing position—no projecting knobs to mar clean-cut cabinet lines. Operated with a light fingertip touch—you don't have to take your eyes off the picture.

EASY-TO-OPERATE—JUST 2 MORE CONTROLS THAN BLACK AND WHITE TV—you can select the exact color hue and intensity you prefer. If you can tune black and white TV, you can tune Admiral Color TV!

255 SQ. IN. ALUMINIZED "COLOR-MAGIC" PICTURE TUBE—"Magic Mirror" of aluminum inside screen beams all brightness out toward you—it's not lost inside tube. Tube has 3 electron guns, one for each primary color—red, blue, and green. A high-voltage electron beam from each gun activates hundreds of thousands of phosphor dots on the screen. Your eye automatically "blends" these glowing primary colors so that on the screen you see, sharp and clear, a beautiful true color picture—real as life! You'll enjoy richer, crisper black and white programs, too!

ALL-NEW COLOR TV CHASSIS—The very finest in dependable, trouble-free color TV performance—thanks to years of research in Admiral engineering laboratories! Full complement of 29 tubes plus 2 germanium diodes—no selenium rectifier (additional tube and crystal mixer with 82-channel tuner). Has ample reserve power for "fringe" areas, overrides city interference—you enjoy a better picture *wherever you live*.

REDESIGNED POWER SUPPLY SYSTEM uses full 20,000 volts of picture power. More stable power supply gives longer, trouble-free operation.

TROUBLE-FREE CONDENSERS WITH NEW "MYLAR" INSULATION have exceptional moisture resistance and temperature stability—last many times longer than ordinary paper condensers.

SHARP, CLEAR, "BLACK AND WHITE" PICTURES, TOO—Admiral's improved "color killer" circuit automatically cuts out unused color circuits during black and white programs.

IMPROVED BALANCE OF COLORS—Advanced circuit design

compensates for any color tube and other variation—insures ideal color balance and purity at all times.

NEW DEFLECTION SYSTEM CIRCUITS give clean, sharp color picture edge-to-edge, top-to-bottom. No blurring or smearing of corners.

WIDE-BAND COLOR I.F. SYSTEM eliminates blurred colors, insures maximum fine color detail.

NEW AUTOMATIC COLOR CONTROL CIRCUITS hold color picture uniform, override color signal variations. New Chroma AGC eliminates fading of colors. Automatic Hue Control holds colors true at any level you select.

PERFORMANCE-PROVED ADMIRAL TURRET TUNER—So accurate fine tuning is seldom needed. Channels may be adjusted at installation time for peak reception without removing chassis from cabinet. Uses coin silver contact points—the finest conductor known.

41.25 MEGACYCLE I.F. AMPLIFIER gives maximum gain, selectivity, rejects interference.

RETRACE LINE ELIMINATOR automatically eliminates annoying diagonal white lines when tuned to full brightness, during "dark" scenes, and change of scene in TV programs.

"GATED" AGC eliminates airplane flutter and fast fading. Holds picture quality uniform when signal strength varies, suppresses interference from auto ignitions, etc.

NEW "NOISE GATE" CIRCUIT suppresses picture roll, "jitter," other interference. Improves picture stability in both "fringe" and city areas.

CONVENIENT FRONT SERVICING CONTROLS concealed behind removable front panel. Serviceman can see picture while he makes adjustments. No need to remove chassis.

BUILT-IN RADIATION SHIELD suppresses interference with nearby TV sets.

DEPENDABLE AC-TRANSFORMER-POWERED CIRCUIT for longer, service-free life of components, cooler chassis operation.

BUILT-IN 82-CHANNEL UHF-VHF WITH EXCLUSIVE "SPIN" TUNING (Optional). Spin the dial—there's your station—picture and sound in a second! Exclusive "Spinner" turns tuning dial like a fishing reel for fast channel selection, also turns slowly for accurate fine tuning. Simple, trouble-free—no clutches, discs or strings to get out of order.

WIDE RANGE FM SOUND SYSTEM for extended tonal range and clear, static-free music reproduction.

INFINITELY VARIABLE TONE CONTROL—Provides infinite variety in tonal shadings, adjusts to reduce background noise in fringe areas. Not limited to just 2 or 3 positions.

8" HEAVY DUTY PM SPEAKER reproduces all tonal ranges from lowest bass to high treble with full fidelity at all volume levels. Acoustically matched to cabinet for superior tone.

24-HOUR "LIFE-TESTED" in continuous operation before leaving the factory—not just briefly "spot checked."

POWER SUPPLY—Operates on 117 volt 60 cycle AC.

FULL 1-YEAR PICTURE TUBE WARRANTY—90 days on other parts.

UNDERWRITERS' APPROVED for full safety and dependability.
