

Remote Control Chassis Assembly as installed in General Electric Television circa 1959. TV Chassis M5 & U4 model numbers include: 21C3559, 21C3567, 21C3570, 21C3571, 21C3573, 21C3575, 21C3576, 21C3580, 21C3581, 21C3585, 21C3586 and others?

Remote was adapted to an RCA Color TV (CTC 16) we used during the early 70's. This knob was wrapped with metal foil tape and then electrical tape was applied to areas corresponding to channels where the motor needed to stop. The knob was installed on the shaft going between the motor and the tuner and a small bracket was fashioned to hold two small wires used as brushes for this crude but effective homemade switch (corresponds to switch on the previous page marked with an *).
