THE simplest possible television receiver in a table type cabinet with only two front controls, "picture brightness" and "sound volume." It incorporates the new superhet chassis and gives a brilliant black and white picture 8\(\frac{3}{8}\)" wide \(\times\) 6\(\frac{3}{8}\)" deep. The lowest price "His Master's Voice" television receiver for 1940, it gives the biggest picture possible in a cabinet of such compact design.
