

MODEL 900 (*below*). Combined television sight and sound and all-world radio receiver.

The black and white picture 10" by 8" is reflected from the face of the cathode ray tube into a mirror in the lid of the instrument and it can be viewed with comfort over a wide angle from any normal sitting position.

The controls are grouped on both sides of the tube face beneath the lid and easy operation is an important feature of this fine instrument.

The radio receiver incorporated is a six-valve four-waveband all-world superhet, with waveranges extending over 16.7-53, 46-141, 185-560, 750-2,250 metres for the normal sound programmes.

Price 80 gns.

OR BY HIRE PURCHASE
