THE STRANGEST DREAM THAT MAN HAS EVER DREAMED

IT IS HERE

*the magic eye . . . the enchanted mirror . . .*

*The fantastic dream of ancient witches*

*who were burnt for their dreaming . . .*

*Television, youngest, strangest, most*

*intriguing of all the miracles of Science.*

NOW WITHIN THE REACH OF ALL

PLEW TELEVISION LIMITED

THE GREATEST THRILL OF THIS NEW AGE

A darkened room. Suddenly a mirror glows. A human being - miniature yet real, has appeared from nowhere - is singing and dancing in front of you . . . Your first view in a Plew Television set is a thrill you will never forget. The fascination will grip you. Due to the Plew discoveries, clear, steady television suddenly becomes practicable at a price within everyone's reach. The B.B.C., alive to the position, are out to do big things in the way of programmes . . . encourage them by buying a Plew set . . . you'll never again be content just to *listen* to your radio . . . you'll want to *see* it too . . . A Plew set is so simple, just plug it to your present radio . . . ask your dealer to-day.

MODEL NO. 1: 10 GNS. STANDARD MODEL: 18 GNS. LONG RANGE MODEL: 22 GNS.

SEE AS YOU LISTEN

## SHOWING THE SIMPLICITY OF OPERATION—

1. Turn this knob as far as it will go to the right.
2. Press down this switch to "on" position.
3. When motor is running at correct speed, the stroboscope will appear stationary. Turn knob (No. 3A) to increase or decrease speed of motor.
4. Immediately the stroboscope is stationary as explained in No. 3, press this switch to the "on" position.
5. Although the picture is now synchronised, errors in transmission may occur, and this lever is to be used to compensate for such errors. It should be moved whichever way is necessary until the picture becomes steady. Should the picture move during the broadcast, it can be brought back to a stationary position by a further movement of the lever.
