MODEL 838. *Here is the last word in home entertainment —a television set, a broadcast receiver, and a radiogram with automatic record changer, combined in one cabinet ; minimum number of controls make this model extremely simple to operate ; television picture size 7½" x 5½" ; vision brightness and sound volume controls on front of grille ; 5-valve 3-waveband superhet radio circuit ; sidescale dial with automatic wavechange ; master tone control ; cabinet 36½" h. x 39½" w. 18½" d. ; consumption 200 watts ; for A.C. Mains*

Simple H.P. Terms available. **65 Gns.**

MODEL 819. *Combined television and radio table model equipped with press-button tuning. The television screen is similar in size to the 817 model, offering really excellent brilliance and definition, and there is only one principal television control. On the radio side a 5-valve superhet circuit offers you the finest reception from six pre-set stations at the touch of a button and you vary the choice of stations to suit your own preferences or local reception conditions. Other features include : automatic volume control ; provision for extra speaker. Cabinet : 23" h. x 17" w. x 12" d. For A.C. Mains—consumption 150 watts.*

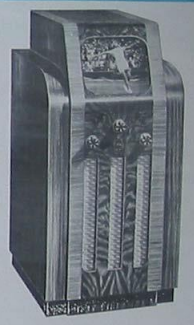
Simple H.P. Terms available. **29 Gns.**

MODEL 817. *This unique television table model enables you to enjoy television in your home in the simplest and most inexpensive manner. Specially designed as a supplementary unit for existing radio receivers it can be used in conjunction with any radio receiver having pick-up terminals and where A.C. Mains current is available. The television picture, size 4" x 3", though smaller than the other models in the Pye range is of outstanding brilliance and definition and can be viewed in perfect comfort. One principal control ensures extreme ease of operation while the screened lead allows the receiver to be simply connected to the pick-up terminals of the radio set. Cabinet 16" x 13" x 12". Consumption 110 watts.*

Simple H.P. Terms available. **21 Gns.**

MODEL 815. *For reception of the B.B.C. television sight and sound programmes this new Pye television table model has many outstanding features. The screen, measuring 7½" x 5½", can be viewed from an unusually wide angle. There are only 2 principal controls—one for sound volume, the other combining vision brightness and on/off switch. Also, for the first time in television set design, the vision and sound circuits have been built into one combined chassis—resulting in more compact design and still greater all-round efficiency. Thirteen latest type valves are included in the combined circuit, ensuring excellent picture brightness and generous sound volume. Cabinet size : 19" h. x 17" w. x 14" d. For A.C. Mains operation—consumption 150 watts.*

Simple H.P. Terms available. **30 Gns.**



MODEL 4046. *And here is the famous console model which has set the standard for home television. Designed for television sight and sound reception, it provides a brilliant black and white picture, size 7½" x 5½". There are only 3 principal controls and the compact, satin walnut cabinet (34½" h. x 17½" w. x 20½" d.) has been specially designed to occupy the minimum floor space. For A.C. Mains—consumption 180 watts. Companion Model (4046A) for distances over 25 miles from transmitter—one guinea extra.*

Simple H.P. Terms available. **43 Gns.**
