

1946 → 1956

A LEADING ELECTRONIC TRAINING SCHOOL  
 Day, Night, Home-Study  
 COURSES IN MOST FIELDS OF ELECTRONICS  
 Serving Canada From Coast to Coast  
 CONTRACTORS TO THE CANADIAN GOVERNMENT

**RADIO COLLEGE  
 OF CANADA**

HEAD OFFICE — 461 KING ST. W., TORONTO 28, ONT.

**IMPORTANT - READ THIS FIRST!**

This index covers the 11-year period from the beginning of 1946 to the end of 1956; which is to say, radio supplements from 11 to 38 and TV supplements from 1 to 23. It cannot be considered absolutely complete for 1956 because data on a few models received near the end of the year cannot be made available until early in 1957.

In most cases, the listing for each manufacturer starts with his model numbers, the appropriate supplement number being shown in the right hand column. This is followed by a column of chassis numbers. However, on manufacturers' bulletins, the terms "Model" and "Chassis" sometimes get interchanged. Therefore, both columns should be inspected.

There are also special cases where this obvious method of listing has to be changed. For example, it is difficult to classify a simple designation like T1802 with a complex one like T23B1X-2X. How this was got around may be seen by inspection of the Admiral TV listing starting on Page 15. The listings have been divided into four groups as follows: (1) Short designations beginning with a numeral (451C). (2) Simple designations beginning with a letter (T1802). (3) Complex designations beginning with a letter (C23A1X), the initial letters being arranged in alphabetical order. (4) Complex designations beginning with a numeral (26X25X). A superficial glance should show in which group the required designation should appear.

In some cases, two supplement numbers may be given for one model. This will be for one of two reasons: (1) The later supplement gives data on a revised version or (2) the early supplement gave only preliminary data, the complete data being provided by the later supplement.

A Hallicrafters chassis might be used in either a Hallicrafters or a Trav-Ler model. Consequently both listings should be inspected.

**MANUFACTURERS INDEX  
 (Pages On Which Listings Start)**

## RADIO COLLEGE OF CANADA . . . .

is a leading Electronics Training School

Radio College of Canada, established in 1928, is the oldest Radio School in Canada, and has been in continuous operation through more than 28 years of growth of ELECTRONICS — Radio, Television, Communications. It is licensed in every province in Canada where such registration is required, as well as by the Department of Transport at Ottawa. These include regular approval of all lesson-material and equipment, our teachers and field representatives, as well as of all publicity.

Graduates of the College now serve in every branch of the Industry, as well as in the field of Communications. It would be hard to find an employer of importance in Canada who does not employ one or more of our graduates in technical, administrative or sales positions. Many more are successfully in business for themselves. The life-success of our many graduates — now throughout Canada, the United States and foreign countries — is the most effective testimonial possible to the soundness of R.C.C. training.

### PLACEMENT BUREAU

One of the major activities of the College is its Placement Bureau, which is operated without cost to either Employer or Graduates. R.C.C. graduates are in constant demand by leading employers across Canada, and have been placed in such important government departments as Research Council, Defense Research Board, and Atomic Research Division; besides all major Shipping Lines, Air Lines, Broadcasting Stations, and in every branch of the Industry where trained personnel are required.

### OTHER COURSES OFFERED BY RADIO COLLEGE OF CANADA

Tuition is available in almost every branch of ELECTRONICS. Courses are offered in DAY, Night or Home-study Plans. We also offer custom-planned training for specialized subjects in Electronics—Complete or partial courses to meet the requirements of any group or project—both Individual and Group Tuition—Paid personally, by Company, or on Payroll Deduction Plans.

These Courses include: Radio, Television, Color Television, Electronic Communications, Radio Operating, Radar, Radio Engineering, Electronics and five Electrical plans.

Full information on any Course, may be obtained by writing to:
