The President

Albert Kulick

FOLLOW THIS PROCEDURE IF A SATISFACTORY PICTURE IS NOT OBTAINED BY THE 4 STEPS IN PRINTED DIRECTIONS.

black, buff, red or silver
No. 041 Cocker Spaniel

In installing ASTRO ANTENNA, disconnect present antenna, take it away from your set. Connect both ends of the antenna to the two lead screws. Tighten securely. Turn on your set. With the pet in hand move it around on top of set to various positions to get best possible picture. If you can't get a good picture then move the pet around slowly in all directions as far as wire allows if necessary. Somewhere in area above set will be found ideal spot. Now slowly move pet back to top of set. At this point antenna has been matched to tuner in your set. You may find it necessary to move pet slightly from channel to channel in some instances. This cannot be overcome in indoor antennas. Sometimes it may take as long as 10 to 15 minutes to achieve best position.

buff, red or silver
No. 022 Springer Spaniel

black, silver, pink or blue
No. 027 French Poodle

black, buff, red or silver
No. 051 Bassett Hound

If after this procedure you are unable to obtain a satisfactory picture, disconnect one end of antenna, being careful not to allow loose lug to touch connected one; bend it back away from attached lug, tighten screw and go thru the same procedure as at first viz: move pet around slowly in all directions, etc.

buff, red or silver
No. 101 Cat

If this does not give result wanted then connect both ends together to only one screw, tighten securely and proceed as first outlined. If still not satisfactory, reverse position of the lugs on the screw and tighten.

black, buff, red or silver
No. 121 Boxer

black, buff, red or silver
No. FB-19-1 Siamese Cat
