A Look At The Early History of Los Angles' W6XYZ/KTLA And The Influence of Klaus Landsberg In Creating This Facility

Presented By James E. O'Neal
at the Early Television Foundation Conference
– May 6, 2017

THE ELECTRONIC
VIDEO RECORD
(EVR)
AND ITS PLAYER

A black and white photograph of a city skyline, likely Detroit, viewed from across a body of water. The skyline features several prominent skyscrapers, including the Renaissance Center. The water in the foreground is choppy with small waves. The sky is overcast with some clouds. The title text is overlaid on the upper half of the image.

Miscellaneous

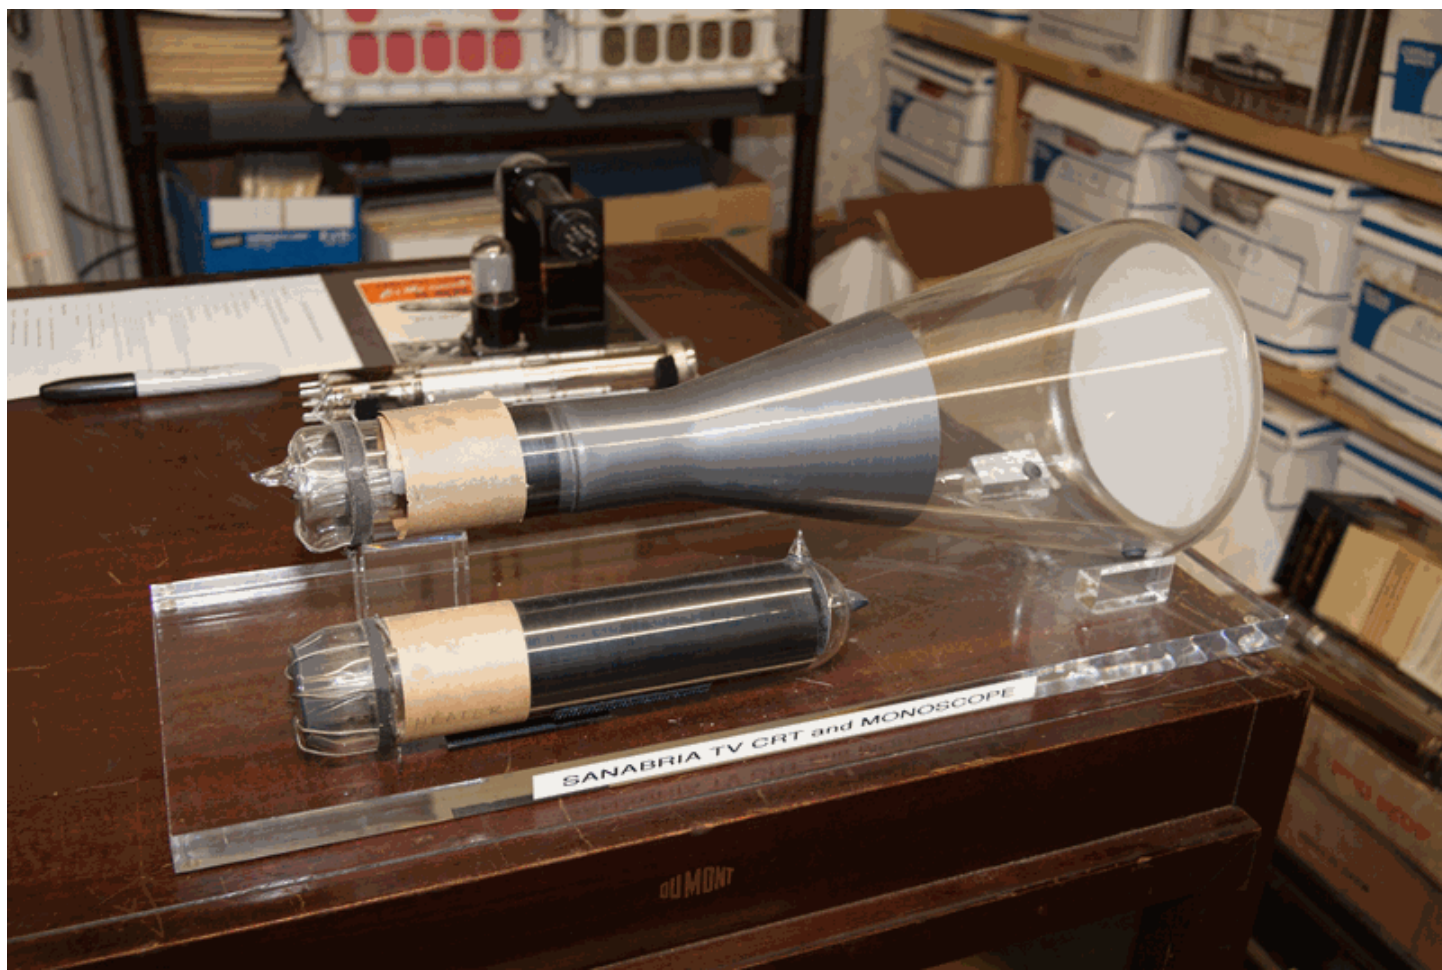

Coscor 54

This was made in 1955, and was the cheapest of Coscor's sets. The cabinet was in very poor condition due to water damage.

Model 139, introduced in 1939 to provide a signal source to align the video and aural IF stages in prewar TV receivers.

Philco Television Oscilloscope
Introduced by Philco in 1939 as a specific television set.

1939 Television Kit Chassis
This is a pre-war kit chassis that was built by an RCA tube engineer in 1939. It tunes two channels, using some of the same parts as the RCA 1939 series. The design came from the Sylvania company, which made the IF transformers.

RCA Television Alignment Oscillator
Model 139, introduced in 1939 to provide a signal source to align the video and aural IF stages in prewar TV receivers.
