SPECIAL REPORT #1

WHAT'S NEW IN OLD TVS

The Newsletter of the Early Television Foundation

Greetings Early Television Fans,

This **Special Report** is to inform ETF members of some great news for the ETF Museum. Some months ago, Steve McVoy was approached by Adam Moore from SGP, his company, who brought ETF an interesting proposal. His company is interested in the current museum building because of it's location and he is willing to trade a better building that will become the new Museum. At first, this seemed to good to be true, so not much was said to members. During the last few months, **Steve and Adam have negotiated on all issues and on Nov. 2 have signed an agreement that starts the process. Steve reports the move could begin in early 2027.** We also know that Adam's company will move the museum contents and make all necessary changes in the Moose Lodge, including construction of a 2000 sq. ft. storage building. These are game changers for the Museum. There will be ways all members could help. I've attached some pictures from a quick tour we took last May.
